PROLEGOMENA

I. LIBERTAS—A CIVIC RIGHT

Freedom, comprising as it does two different concepts, namely “freedom from” and “freedom to”, neither of which admits of any but general definitions, is a somewhat vague notion. This is also true of the Latin “libertas”. Libertas primarily denotes the status of a “liber”, i.e. a person who is not a slave, and comprises both the negation of the limitations imposed by slavery and the assertion of the advantages deriving from freedom. In view of its twofold meaning, liberty can perhaps more easily be explained if slavery, its direct opposite, is explained first.

Without entering into detailed discussion, the salient characteristics of slavery in Roman law can be described as follows: slavery at Rome is a legal institution whereby one person is subjected to the mastery (dominium) of another person: slaves are almost entirely rightless and can neither be entitled to possess or do anything, nor to contract liabilities: a slave is always “in potestate” and “alieni iuris”.

Broadly speaking, therefore, slavery consists in rightlessness and subjection to dominion.

It appears from these characteristics of slavery that the term “persona sui iuris”, which signifies the status of complete personal freedom, implies that to be free means to be capable of possessing rights of one’s own, and this is possible only if one is not subjected to someone else’s dominium (or patria potestas). Libertas therefore consists in the capacity for the possession of rights, and the absence of subjection. Obviously, the positive and negative aspects of libertas, though notionally distinct, are essentially interdependent and complementary.

5 Gai Inst. 1, 48–52 = Inst. 1, 8 pr. sq. = Dig. 1, 6, 1 pr. sq.
6 Subjection to dominium causes ipso facto the extinction of all the rights and liabilities of a freeman, and, on the other hand, release from dominium (i.e. manumission) causes ipso facto a slave to acquire rights and to contract liabilities.
The negative aspect of libertas, as any other negative concept, is self-defined (although, of course, it is of necessity ill-defined). On the other hand, the definition of the positive aspect presents some problems. For if, positively, freedom means the capacity to enjoy certain rights of one's own, two questions arise: First, whence does that capacity spring? Is it innate or acquired? Secondly, what is the character and extent of the rights in which freedom consists? To answer these questions we must inquire into the nature and foundation of libertas, and may well start with the definition of freedom in the Digest.

"Libertas est naturalis facultas eius quod cuique facere libet, nisi si quid vi aut iure prohibetur. Servitus est constitutio iuris gentium qua quis dominio alieno contra naturam subicitur." 1 If, as this definition lays down, freedom is a natural faculty, everyone is originally free; and, since the positive institution of slavery is contrary to nature, it follows that freedom is a natural right innate in every human being. 2 But noble though it is, this concept of freedom was foreign to Roman law under the Republic and the Early Principate. 3 The theory concerning freedom and slavery prevalent in that period may be gathered from the legal practice, most clearly perhaps from the peculiar institution whereby Roman citizenship, and not freedom only, was bestowed on slaves manumitted in due form. 4 This institution did not arise from generosity

1 Dig. i, 5, 4 pr. Cf. also Dig. i, 1, 4 and xii, 6, 64. Since the word "naturalis" is possibly interpolated, the definition as it now reads in the Digest may be of later date than its original author, Florentinus, a jurist of the late second or early third century A.D. Cf. F. Schulz, Prinzipien des römischen Rechts, Munich, 1924, p. 95 n. 2.

2 Buckland, Text-Book, p. 62, explains this definition as meaning that liberty is dependent upon the subject's internal freedom from the restrictions of his lower nature. But if that were the case it would be difficult to see why submission to dominium should be "contra naturam", i.e. contrary to Nature.

3 Ius naturale from which this conception of freedom derives is, with the exception of Cicero, a product of the Imperial period. See Buckland, Text-Book, pp. vi and 52 f. It is noteworthy that Gaius (second century A.D.), Inst. 1, 52, regards a master's potestas over his slave as an institution of ius Gentium but not as being contrary to nature.

4 See Cic. Pro Balbo, 24; Ulp. Reg. 1, 6; Dig. xxxviii, 2, 1 pr. Bestowal of Roman citizenship on slaves manumitted in due form was unrestricted under the Republic, see Buckland, Slavery, pp. 444 f. Restriction in this matter was introduced by the Lex Aelia Sentia of A.D. 4. Informally manumitted slaves...
on the part of the Romans; had manumission effected merely release from dominica potestas, the slave would have become a res
nullius, not a free man, because to be free means to be a member of
a civic body.\(^1\) A Roman citizen who by being made a slave is
excluded from any polity suffers extinction of all his rights, personal
and political,\(^2\) whereas a slave admitted to Roman citizenship by
manumission "vindicta aut censu aut testamento" acquires full
freedom.

The essentially civic character of libertas can also be seen from
the status of foreigners at Rome. The Roman State recognized and
protected the freedom of those foreigners alone who were citizens of
States which concluded a treaty with Rome. All other foreigners,
although not necessarily treated as actual slaves, were, while in
Roman territory, in the legal position of a servus sine domino,
which meant that they were considered rightless and the Roman
State would not protect them if they were deprived of their freedom.\(^3\)

It is therefore clear that the Romans conceived libertas as an
acquired civic right, and not as an innate right of man.

2. LIBERTAS AND CIVITAS

We must now consider the extent of libertas. At Rome and
with regard to Romans full libertas is coterminous with civitas.
A Roman’s libertas and his civitas both denote the same thing, only
that each does it from a different point of view and with emphasis on
a different aspect: libertas signifies in the first place the status of an
individual as such, whereas civitas denotes primarily the status of
enjoyed de facto freedom while considered as de iure slaves; see Tac. Ann.
xiii, 27, 4: quos vindicta patronus non liberaverit velut vinculo servitutis
attineri. Cf. also Buckland, *Slavery*, p. 445. The compromise resulting in the
creation of the so-called Latini Iuniani was an innovation of the Early Empire.
For the date of the Lex Iunia see Buckland, *Slavery*, pp. 534 f. and C.A.H.

Early Patterns of Manumission, *J.R.S.* xxxvi (1946), pp. 57 ff.

\(^1\) See Buckland, *Slavery*, p. 136 n. 4, p. 439; Text-Book, p. 73. Cf. Daube,

\(^2\) This is the so-called Capitis Deminutio Maxima.

\(^3\) See Th. Mommsen, Bürgerlicher und peregrinischer Freiheitsschutz im
pp. 255, 263; id. Staatsrecht iii, pp. 590 f., 596, 598 f.; and also E. Schönbauer,
an individual in relation to the community. Only a Roman citizen enjoys all the rights, personal and political, that constitute libertas.

The so-called Capitis Deminutio Media whereby a Roman loses citizenship while retaining freedom does not contradict this conclusion. For Capitis Deminutio Media means loss of Roman citizenship as a consequence of the acquisition of a different citizenship. And, besides, the freedom which one retained after the loss of Roman citizenship was qualitatively different from that which one had enjoyed before, for libertas ex iure Quiritium is freedom in respect of private and public law alike, whereas the libertas of a person who was not a Roman citizen (Quiris) was freedom in respect of private law only.

If then the libertas of a Roman is conditioned by his civitas, the amount of freedom a Roman citizen possesses depends upon the entire political structure of the Roman State. In Rome—as elsewhere—freedom of the citizen and internal freedom of the State are in fact only different aspects of the same thing. Therefore libertas civis Romani or libertas ex iure Quiritium must be defined in terms of libertas populi Romani Quiritium.

3. Libertas Populi Romani

With regard to peoples or States libertas is used in either of the following two senses:

(a) Sovereign independence and autonomy, the prominent feature of which is “suae leges”, a term equivalent to the Greek autonomia. The opposite of a populus liber is populus stipendiarius or subjectus. This aspect of libertas need not be

3 Festus, s.v. deminutus (p. 61, ed. Lindsay): Deminutus capite appellatur qui civitate mutatus est. Mommsen, Staatsrecht III, 42 f., pointed out that loss of citizenship was as a rule a consequence of mutatio soli.

dealt with in the present study, since during the period with which it is concerned Rome’s own independence was too secure to be a problem at all.

(b) Republican form of Government. In this respect the opposite of libertas is regnum which, if used in its proper sense, invariably implies absolute monarchy.\(^1\) The relation between king and people is considered to be analogous to the relation between master and slaves. Consequently monarchy is called dominatio; and subjection to monarchy servitus. Freedom enjoyed by a State negatively means absence of dominatio, just as freedom enjoyed by an individual negatively means absence of dominium. But in respect of States, just as in respect of individuals, the negative aspect of freedom does not alone constitute complete liberty. Tacitus voiced a deep-seated conviction of the Romans when he said that the Armenians, who had expelled their queen, were “incerti solutique et magis sine domino quam in libertate”;\(^2\) for mere removal of dominatio may eventually result in anarchy, whereas libertas consists in rights which rest on positive institutions.

The Romans dated their own freedom from the abolition of monarchy and identified it with the republican constitution of the commonwealth.\(^3\) The res publica populi Romani Quiritium\(^4\) is the practical embodiment of libertas populi Romani, just as civitas Romana is the embodiment of libertas civis Romani. Ultimately, therefore, the nature and extent of libertas are determined by the nature and form of the Roman constitution.

\(^1\) When Porsenna sent an embassy to Rome urging the restoration of Tarquin (cum ille peteret quod contra libertatem populi Romani esset) the Romans replied: Non in regno populum Romanum sed in libertate esse. ita induxisse in animum, hostibus portas potius quam regibus patefacere; ea esse vota omnium ut qui libertati erit in illa urbe finis, idem urbi sit (Livy I, 15, 3). This passage is typical of the republican attitude towards monarchy. For regnum as a somewhat loose term of political invective implying domination rather than monarchy, see below, pp. 62 ff.

4. The Object of this Study

But the Roman constitution is not itself a constant. The Romans were well aware that their republican constitution was the result of long and gradual development. And libertas, while identified with the republican constitution during the Republican period, continued to be a popular slogan and a constitutional principle under the Principate. The question therefore arises, whether the political content of Roman libertas changed according as the Roman constitution was transformed.

It is proposed in this study to describe the meaning of libertas as a political idea at Rome during the two hundred odd years between the Gracchi and Trajan, a period in which the Republican constitution gradually gave way and was finally superseded by the Principate which, in its own turn, considerably changed during the first century A.D.

In the period at which this study begins, Roman republicanism had already reached its highest stage of development. In the long course of that constitutional development certain general principles were laid down, and certain practices established. Those principles form the constitutional background of the political struggle which resulted in profound constitutional changes. In order to avoid the confusion that may arise from mistaking political programmes for constitutional principles, or vice versa, it is desirable in the first of the subsequent chapters to determine and isolate those general principles which from a theoretical point of view constitute Roman republicanism and Roman political liberty.
