

Calculating GPA

Each student's GPA is based on semester grades received in each class from 9-12 grade. One-half credit is earned for each semester of academic and activity classes. The GPA is determined by the consideration of grades in all subjects without regard to weighting with the exception of Advanced Placement classes. Each semester of Advanced Placement courses are weighted as follows: A=5 points, B=4 points, C=3 points. Grades below C are not weighted.

To use the calculator below, put in each of your semester grades using "Regular" for non -AP classes and using "College" for AP classes with semester grades of C or above.
