

Ultimate Favorites Word Cloud

Directions: Create your own Word Cloud using a free website such as www.wordclouds.com

1. **Type your name (first and last) 5 times.** The more times you type a word, the larger it will appear on the word cloud.

****Important:** Use the tilde symbol (~) in place of the space between words if you want two words to stay together.

Tilde Character: Use the tilde character, ~, on your keyboard in place of the space between words when you want two or more words to stay together. For example, I~Love~Dogs would allow all three words to appear as a phrase in Wordle instead of having them split up into three different places.

2. Type each of your favorites in the text box that appears.
3. Once you generate your word cloud, you use the toolbar to change the shape, color, add words, etc.
4. When you are finished, save your word cloud as "Favorites."
5. Go back to Canvas and submit the saved file as the assignment.
